# VISION XTRA AS A FILM PRODUCTION HOUSE

Vision Xtra Pvt Ltd is not just a Film Production House; it is a creative powerhouse that breathes life into captivating stories and brings them to the silver screen. Established with a passion for storytelling and a commitment to delivering extraordinary cinematic experiences, Vision Xtra has emerged as a trailblazer in the world of entertainment.

## Different Types of Video Film Made By Vision Xtra

### 1. TV Spot Video / TVC / Ad Film

A TV spot is like an advert you see on television for services or products. It has a story, actors and a message and it aims to convince the viewer of the benefits of the product or service the advertiser is promoting.

### 2. Documentary Video

A documentary film or documentary is a non-fictional motion-picture intended to "document reality, primarily for the purposes of instruction, education or maintaining a historical record"

### 3. Animation Video

Animation is a video style made from many still images. When images are played together one after another, they give the illusion of movement. This style is great for depicting something that can't be found in the real world.

2D animation is flat like a comic or a cartoon.

3D animation has dimension and depth, like most modern animated films and video games.

### 4. Motion Graphics Videos

Motion Graphics Videos are a style of animation that uses text and shapes to communicate, but these types of video don't usually tell a story. These videos typically add music, sound, and voice-over to convey simple information with energy and power.

### 5. Whiteboard Videos

Whiteboard animation tells a creative story with pictures drawn on a whiteboard by artists who record their artistic process. Any complicated constructs, can be explained in an easily digestible way on whiteboard or black, green, and glass board.

### 6. Typography Videos

Moving text or kinetic typography is an animation technique that blends movement and words to express ideas. Some people respond to visuals, and some respond to the written word. Kinetic typography is a great way to grab the attention of both. Seeing words in motion can even evoke sensations of sound and weight.
